

Rainier

From \$2,399

The Rainier has been our best seller for over a decade now. It's not only comfortable to ride, it's light and fast like a road bike, and it fits up to 32c tires with fenders. For light touring or daily riding, this bike rocks. All of this, and hand made in the U.S.A just for you.

- Fits up to 32c tires with fenders
- 3-year warranty on wheels
- 3 bottle mounts
- Hidden fender & rear rack mounts
- Built to ISO standards - Serviceable anywhere
- Hand crafted in Seattle for your unique needs
- No compromise on comfort - It's just your size!

We've designed and spec'd our own light weight steel fork just for use with this bike, as well as a Rodríguez custom carbon fork available as an upgrade. You'll also get braze-ons for up to 3 bottles, a rear rack, and fenders. If you like a classic road bike with narrow tires in the summer, but also want the option to ride up to 32's with fenders in the rainy season, this is your bike! The Rainier, unlike so many other road bikes, gives you a wide range of rim, tire, fender and rack choices.
